## The ViCount HAZER

The ViCount HAZER produces a barely visible atmospheric haze that is perfect for large volume lighting effects.

With a haze particle size of just 0.2 micron (mass median diameter) the ViCount Hazer is truly in a class of its own, and the persistency of the effect is such that a single generator can replace several conventional systems.

The whisper quiet fan fitted to the unit is independently switched, and so the ViCount HAZER is equally capable of producing large volume smoke effects.

Smoke chemical consumption at haze output can be as little as 0.2 litres per 8 hours, so running costs compared to conventional hazers are dramatically lower.

DMX switching is available as an optional extra.

### PRICES

ViCount Hazer 230v or 110v, complete  
With CO2 cylinder / regulator /  
smoke oil /5m remote £ 1499.00

As above, but with Digital DMX  
Single channel interface £ 1959.00

Available direct from **Pea Soup Ltd.**
